Behavior Data Tables

Data Tables are a fast and easy method to generate multiple data sets using basic data input selections. Like Data Grids, Data Tables are comprehensive spreadsheets made up of data columns to present the information.

Behavior Data Tables allow you to download a list of students in a group in a CSV/Excel file. The file may then be downloaded and distributed for additional manipulation, combined with other data, record keeping, or any other purpose.

Information may help districts monitor the effectiveness of behavioral systems and note trends in specific incidents or referrals.
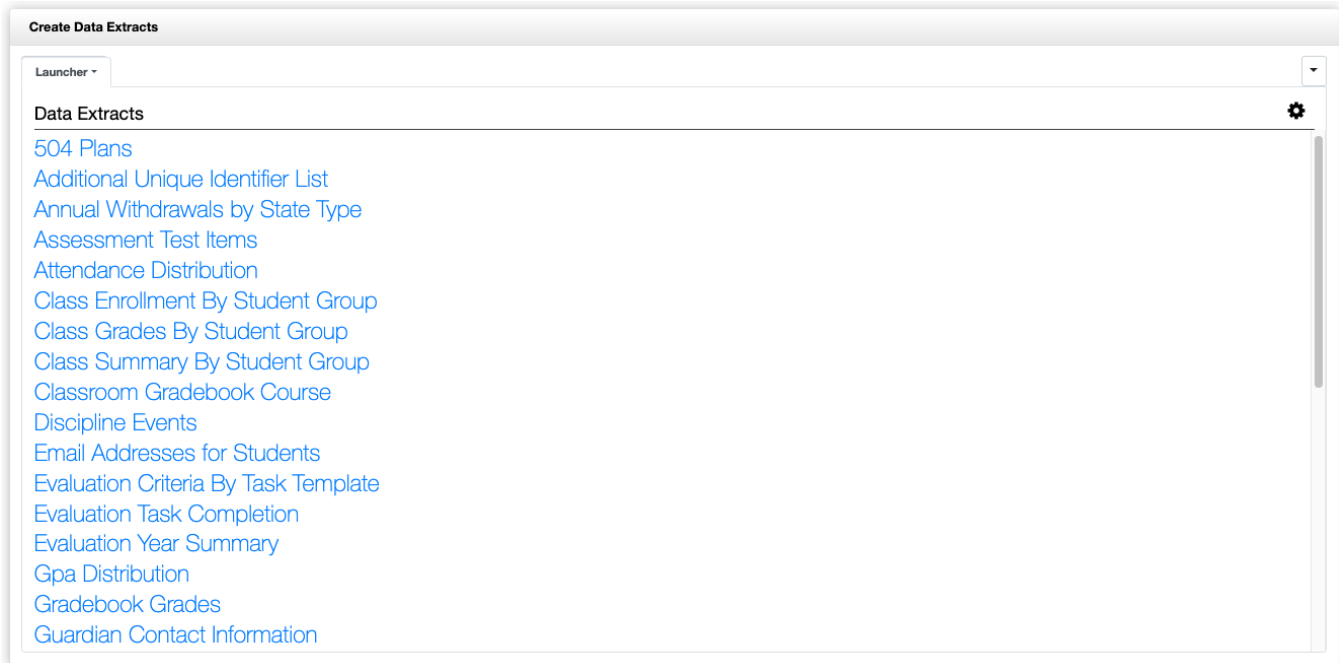

ACCESSING DATA TABLES

Navigate to Homeroom Dashboards and select an **SDS dashboard**. NOTE: See the Homeroom Dashboards - Basic Dashboard Navigation help article for instructions on accessing various dashboards.

 Scroll to the bottom of your dashboard to find the **Create Data Extracts Container** and select your chosen Data Table.

Alternatively, Data Tables may be accessed by navigating the Data Tables App within the Data Extracts Bundle and clicking **Create Data Table** from the left-hand navigation menu.

Next, select **Browse Category** from **Data Extracts,** search for your chosen Data Table, and select **Build Table**.

DISCIPLINE EVENTS

Select a **Student Group** (optional) and **School Year** (optional), then click Save and Generate to Save & Name or **Download XLSX.**
