

Help Identify Native American Students Who are Struggling

All districts must have procedures for identifying Native American/Alaska Native students who qualify for Title III. Students identified as Native American with any one of the Washington State Races selected and academically at risk may qualify for Title III supplemental instructional support.

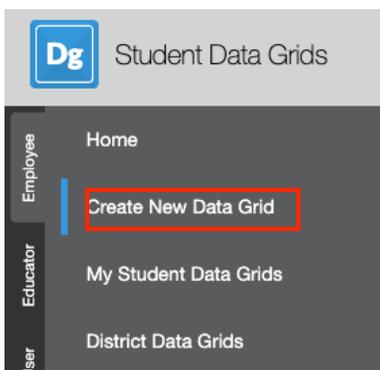

A Student Data Grid can be created to review pertinent data to determine if students are academically at risk. Some of the data points districts have used in this process are included in the directions below. These are just suggestions and can be modified per district.

WHAT YOU'LL NEED:

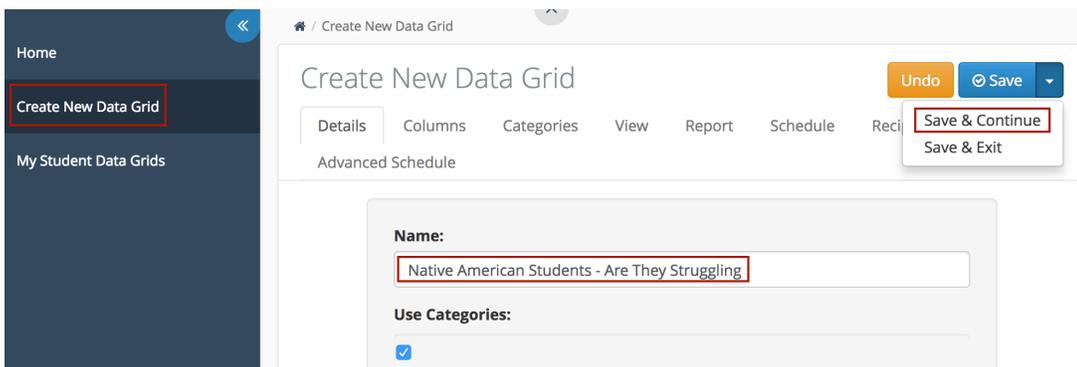

Student group containing Native American students. NOTE: See [Homeroom Dashboards - Creating/Editing Student Groups](#) for directions on creating this Student Group.

CREATE STUDENT DATA GRID:

From Homeroom, click on the **Student Data Grids** icon and click **Create New Data Grids** on the left navigation menu.

Name: 'Native American Students - Are They Struggling' then click the arrow next to the **Save** button and choose **Save & Continue**.

Column Configuration

This brings you to the Columns tab, where we configure the various columns of the Data Grid. Add a column by clicking the “+.” For example, use the following data column configurations:

SSID: Find the **Student** Data Columns, and click **SSID**.

▼ 1 Student - SSID - 1: A
⚙️ Actions ▼

Last Name: Find the **Student** Data Columns, and click the **Action Gear** next to **Name**. Select **LastName** from the drop-down list and click **Save**.

▼ 2 Student Name - LastName - 1: B
⚙️ Actions ▼

First Name: Find the **Student** Data Column, and click the **Action Gear** next to **Name**. Select **FirstName** from the drop-down list and click **Save**. You should now have 3 data columns.

Data Columns +

▼ 1 Student - SSID - 1: A
⚙️ Actions ▼

▼ 2 Student Name - LastName - 1: B
⚙️ Actions ▼

▼ 3 Student Name - FirstName - 1: C
⚙️ Actions ▼

Click in the **Sort Order** box for column 2 **Student Name - LastName - 1:B**, and type in the number ‘1’. This will order your data grid by the student’s last name. Then, click the **Save** button in the top right corner.

NOTE: It’s always a good idea to save periodically to ensure the loss of Internet connectivity doesn’t lose the most recent work done.

⚙ Actions ▼

Services Status: Follow the same steps used for 'ELL Status' to include the status of any service the student might be receiving. This will help to determine if the student needs services through ELL or if they are receiving services in other areas that may help. Services helpful include Special Education, 504, Title 1, or LAP.

Clicking the box next to **Most Recent Score** will search for the most recent score for your selected Assessment(s).

Under Columns to Include: click the box next to **Score**, and under Styles, remove the word 'Score' and replace it with 'Most Recent SBA ELA Score'. Click [Save](#).

NOTE: This configuration will return the student's most recent score for any of these assessments, last year. If it is important to know which assessment the score is for, click the box next to **Assessment Name** under Columns to Include and click [Save](#).

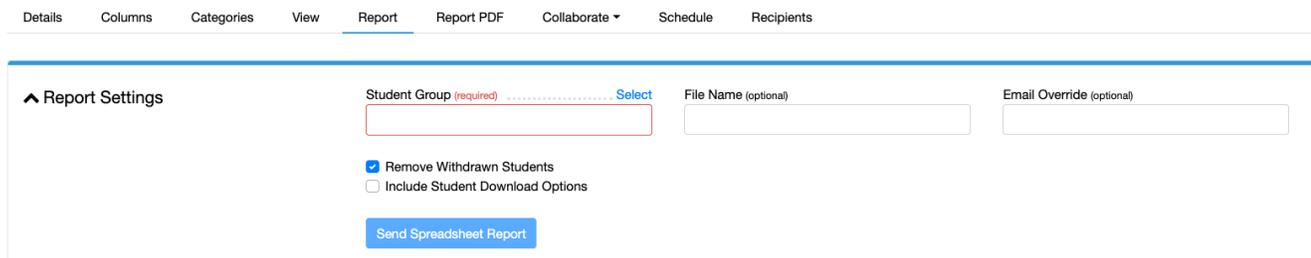

Follow these directions for adding as many assessments as needed to help accurately determine the student's needs.

Once you have added all the data columns, click the arrow next to the [Save](#) button and choose [Save & Continue](#)

RUN STUDENT DATA GRID:

To run the Data Grid for the appropriate students, the Native American student group must be created. If that has not been done, please do so now.

From the Report Tab: Click the [Select](#) Student Group.

Select

Current School Year, My Groups, and click the '+' button next to the name of the Native American student group. Type in a File Name (this is optional). Click the [Send Spreadsheet Report](#).

An email has been sent that will allow the user to download the Student Data Grid. For more information, visit [Download Student Data Grid](#)
