

Hex Color Codes Used in Dashboard Displays

Performance level colors are customizable and can be any color you like. Homeroom uses hexadecimal color values. Some of our common performance level colors have the following values:

Non-Passing Colors		Passing Colors		Non-Level Colors (Information)	
1 Red	#C82300	2 Green Light	#73B432	Blue Light	#004DBE
2 Orange	#FA6500	3 Green Medium	#418718	Blue Medium Light	#589BFF
3 Yellow	#FFAF00	4 Green Dark	#336600	Blue Medium	#1473FF
				Blue Medium Dark	#005BE0
				Blue Dark	#004DBE

How to Find Additional Hex Color Codes:

The hex color codes are available by searching many different websites. You can use keywords like 'Hex Colors' or 'Hex Color Picker' to find these sites. For example go to:

http://www.w3schools.com/tags/ref_colorpicker.asp to locate a new color.

If you prefer to find your own colors at one of the Hex Color sites, please remember not to go too dark with your color choices. Darker colors can make it more difficult to see the actual score data in the display as well as the color printouts.
