

## **Individual Health Plans Data Table**

Using the Individual Health Plan Data Table, districts can generate a spreadsheet extract to monitor Individual Health Plans (IHPs) by school year, student group, school, or health concern. The extract includes data points including health concerns, diagnoses, case manager, school year, plan start date, plan annual review date, and created by the user.

## **Generating IHP Data Table**

1. Navigate to the Data Tables application by clicking on the Application Selectors across the top of the screen. Find the square labeled DE (Data Extracts) and, select the TA for Data Tables, click the enter button.

2. Click Create Data Table from the left navigation menu.

3. Click Browse Category to the right of Data Extracts.

4. Scroll down the list of available Data Extracts and click **Build Data Table** to the right of Individual Health Plans.
