

ALE Release Notes : December 20, 2019

New Features

1. When marking a course completed (changing participation status on Subject/Course record to "Complete") credits available (designated on course) will be assigned. After saving change, this field is editable. Subjects/Courses table was updated to display these values.
2. One or more "Supplemental Certificated Teachers" can now optionally be added to the Details tab of a Student Learning Plan. Assigning this role gives the individual full edit rights to the Student Learning Plan.

Configurations/Updates

1. Visible Scanner Alerts have been expanded from the Certificated Teacher to all other roles.
2. On "Manage Attendance" table, add "Grade Level" column.

Bug Fixes

1. The sort feature is again functioning correctly when data columns include parenthesis.
2. When taking attendance for a class meeting and assigning a status to a group of more than one student in the "Manage Attendance" interface, the letter is again visible when selected.

District Specific

1. Deer Park: Remove "request" certificated teacher function from Parent Role.
2. Deer Park: Update "ALE Class Type" on subject course record from "remote" to "On-Site (Weekly)" upon registration in class.
3. Battleground: Set default on "Weekly Contact" tab to "All Contacts" rather than "Weekly View."
