

March 17th, 2020 LUNCH AND LEARN

Q & A

Questions and answers from the March 17th Homeroom Dashboard Lunch and Learn are listed below. Please contact support@schooldata.net if you need further clarification.

- 1. Is there a fast way to delete multiple assessment sets at once, or do we still have to do it one at a time?**
 - In Homeroom Dashboards this process has been simplified, but we will look into possibilities for other time saving tools. Once on the **Edit My Assessment Sets** screen:
 - Click the **trash can** icon
 - Click **"Yes Delete"** on the "Are you sure...." message

- 2. I don't see the Data Admin menu, do I need to have that added to my roles?**
 - The menu won't appear until after the release. Only users with the Data Admin role will be able to access it.

- 3. (Applies to current custom dashboard districts only) Do we still do a manual upload via Admin after using the builder?**
 - The Dashboard Builder builds in real time, so if you make changes they will be available immediately. There is no need to do a manual upload.

- 4. (Applies to current custom dashboard districts only) Can you load just one dashboard at a time rather than all dashboards at once?**
 - If you're using the builder, there is no need to load. If you don't use the builder and need to upload the spreadsheet then yes, you can "load one" at a time. You can either delete the tabs you don't want to load or put a # in front and it won't load that tab in your upload spreadsheet.
