

ALE Application: Data Admin Date Settings

This article looks at the 4 different Data Admin date settings available in the Data Admin role of the ALE Application. The 4 settings are School Years, Class Terms, Class Term Date Ranges, and Excluded Dates.

School years include start and end dates for the school year that will populate the default start and end dates for Student Learning Plans.

Class Terms are the terms available in the “Manage Class” and “Class Schedule” pages. Changes to these dates directly affect the listed and Available Terms.

Class Term Date Ranges dictate the default start and end dates of the Class Terms. These are surfaced in the “Manage Class” page when terms are selected, and in the “Class Schedule” page when creating a new schedule.

Excluded Dates are days where no Class Meetings should happen. When class meetings are created, meetings that would normally happen on excluded dates will not be created. Additionally, when excluded dates are added, the system will attempt to remove any existing class meetings on excluded dates.

**All of these settings can be found by clicking the “Configuration” dropdown in the left-hand navigation of the Data Admin role.*

School Years

This page can be accessed by clicking School Years in the “Configuration” dropdown. School years can be viewed and Edited from this page.

How to Edit School Years:

1. Select the Data Admin role.
2. Click School Years under Configuration in the left-hand Nav.
3. Use the row action gear to choose “edit” for the year you’d like to enter dates for.
4. Fill out all of the fields.
5. Click Update.

ALE DATA ADMIN

Class Terms

This page can be accessed by clicking Class Terms in the “Configuration” dropdown. Class Terms can be Viewed, Added, Removed, and Edited from this page. Class Terms in this table do not have a concept of subdomains. *Be advised that modifications here will affect every ALE program in the district.*

Class Term Fields and Columns

Class Term (Required) -

This is the name that will show up in the Class Term Selectors and the various tables where class terms are shown. The information in this field cannot be the same as any other class term.

Class Term Abbreviation (Optional) -

This is the short name for the class term. The information entered here does not need to be unique. This will also be what displays in tables and reports that are configured to use term abbreviations.

Class Term Type (Optional) -

There are 6 designations for this field: *All Year, Monthly, Quarter, Semester, Trimester, Triterm*. This field determines which view classes with the term will display in. This most notably affects the “Schedule Classes” page found in student learning plans. There is a different view for each “Class Term Type.” Each view will only display classes that correlate to the selected “Class Term Type.”

Parent Class Term (Optional) -

This field allows you to select a Parent Term from a list of the already existing Terms. Class Terms must have designated ranges to show up in the list. This field is currently informational and doesn't connect to other places in the application.

Class Term Code (Optional) -

A class term code can be entered here. This field is currently informational and doesn't connect to other places in the application.

Class Term Date Ranges

ALE Class Term Date Ranges Table:

The ALE Class Term Date Ranges can be accessed by clicking Class Term Date Ranges in the Configuration Dropdown. Class Term Date ranges can be Viewed, Added, Removed, and Edited from this page. Just like class terms, Class Term Date Ranges do not have a concept of subdomains. *Be advised that modifications here will affect every ALE program in the district using the modified terms.*

Class Term Date Range Fields:

Please make a selection

Class Term (required) Select <input type="text"/>	School Year (required) Select <input type="text" value="2020/21"/>
Start Date (required) <input type="text"/>	End Date (required) <input type="text"/>

Class Term (Required) - This field controlled by a selector. The selected class term will be the date range the term is set for. The Class Terms that show up in this selector come from the Class Terms in the Class Terms Table.

School Year (Required) - This field is controlled by a selector. The selected school year will be the date range the school year is part of. The field will default to the current school year.

Start Date (Required) - The field is controlled by a date selector. This field will be the first date in the date range. Clicking the field will open up the date selector. Dates can also be manually typed using the mm/dd/yy formatting.

End Date (Required) - This field is controlled by a date selector. This field will be the last date in the date range. Clicking the field will open up the date selector. Dates can also be manually typed using the mm/dd/yy formatting.

How to Add Class Term Date Ranges:

6. Select the Data Admin role.
7. Click Class Term Date Ranges under Configuration in the left-hand Nav.
8. Click Add Record on the top right of the table.
9. Fill out all of the fields
10. Click Add

**If a Date range already exists for the selected Class Term and year, you will get an error and the date range won't be added.*

The screenshot shows the 'Manage Class Term Date Ranges' page. The left-hand navigation menu has 'Class Term Date Ranges' highlighted under 'Configuration'. The user profile at the bottom left shows 'Data Admin' selected. The main table has an 'Add Record' button in the top right corner. A modal form titled 'Add Record' is open, showing the 'Class Term Date Ranges' form with fields for Class Term (selected as 'Semester 1 of 2'), School Year (selected as '2020/21'), Start Date (9/7/20), and End Date (1/12/21). The 'Add' button in the modal is highlighted.

How to Edit Class Term Date Ranges:

1. Select the Data Admin role.
2. Click Class Term Date Ranges under Configuration in the left-hand Nav.
3. Click Edit under the Row Action & Options gearbox of the Class Term Date Range you want to edit.
4. Update the dates to be the new desired range
5. Click Update

Semester 1 of 2	2020/21	August 28, 2020	January 21, 2021

Excluded Dates

The Excluded School Year Days can be accessed by clicking Excluded Dates in the Configuration Dropdown. Class Term Date ranges can be Viewed, Added, and Removed. Excluded dates can be configured per subdomain but ability to affect other Subdomains is not limited on this page.

Excluded Dates Fields and Columns

School Year (Required) -

This is the school year that the Excluded date is in. Classes with different school years than the excluded date will not be affected by excluded dates. The filters and form will default to the current school year.

Sub Domain (Optional)-

This is the Subdomain the Excluded date is tied to. Only classes with campuses in the subdomain will be affected by the excluded date. If no subdomain is selected, then only Classes with Campuses who are not connected to a subdomain will be affected. The filters and form will default to the current subdomain

Date -

This is the date where all class meetings will not generate or be deleted when possible.

Start Date (Required) -

The field is controlled by a date selector. This field will be the first date in the date range. Clicking the field will open up the date selector. Dates can also be manually typed using the mm/dd/yy formatting.

End date (Required) -

The field is controlled by a date selector. This field will be the last date in the date range. Clicking the field will open up the date selector. Dates can also be manually typed using the mm/dd/yy formatting.

How to Remove Excluded School Year Days:

1. Select the Data Admin role.
2. Click Excluded Dates under Configuration in the left-hand Nav.
3. Click the checkmark next to the days you want to remove (They should be highlighted in blue when selected)
4. Click Delete under Select Row Actions
5. Click Yes, Continue

**Note: The system will attempt to recreate any missing meetings when the excluded dates are removed.*

The screenshot illustrates the process of removing excluded school year days. The left-hand navigation menu is visible, with the 'Data Admin' role selected (1). The 'Configuration' section is expanded, and 'Excluded Dates' is selected (2). The main content area displays a table of 'Excluded Ale School Year Days' with 5 records. The table has columns for 'School Year' and 'Date'. The first three rows are selected, indicated by blue checkmarks (3). The 'Select Row Actions' dropdown menu is open, and the 'Delete' option is selected (4). A confirmation dialog box is displayed, asking 'Are you sure you want to remove these days?'. The 'Yes, Continue' button is highlighted (5).
