

## Delving into Data V2

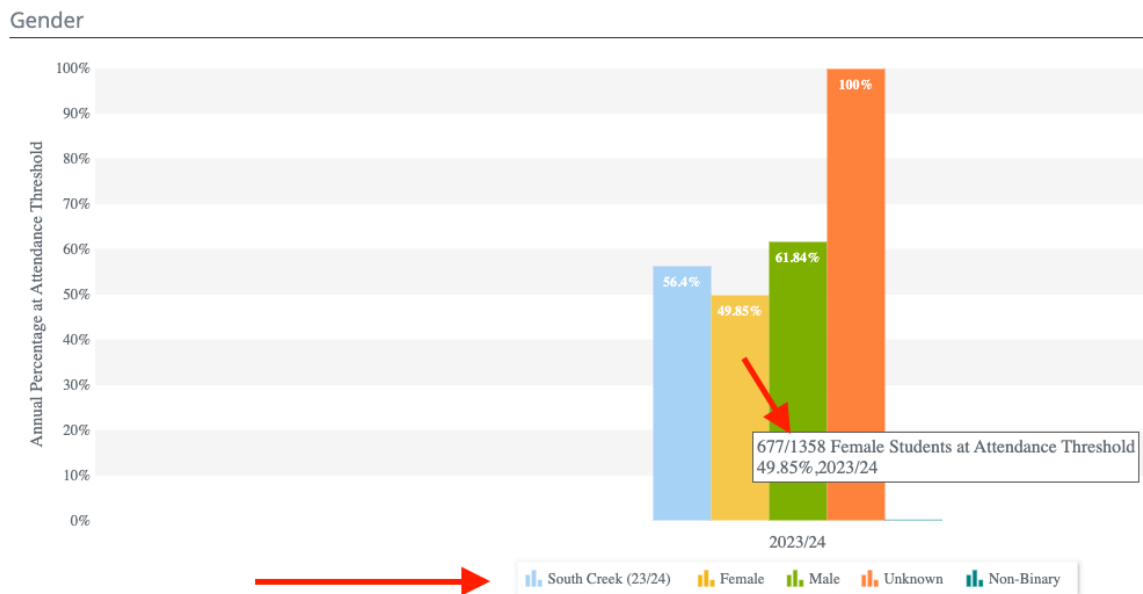

Here, you will learn to analyze assessment data through charts, assessment sets, subgroup comparisons, and risk indicators.

### Key Functionalities

- **Charts** provide detailed data insights, interactive features like clickable elements, and options for creating static groups.
- **Assessment Sets** provide various ways to analyze assessment data, offering customizable settings and views.
- **Risk Indicator Viewers** offer several options for viewing where students are positioned on the threshold of student risk. **Helpful Resource:** [Risk Indicators V2](#)

### Chart Features

1. **Hover** over any bar or column to reveal included **details**.
2. Below the chart, **click any identifier** to **hide** the bar or column from the chart to narrow viewing results.

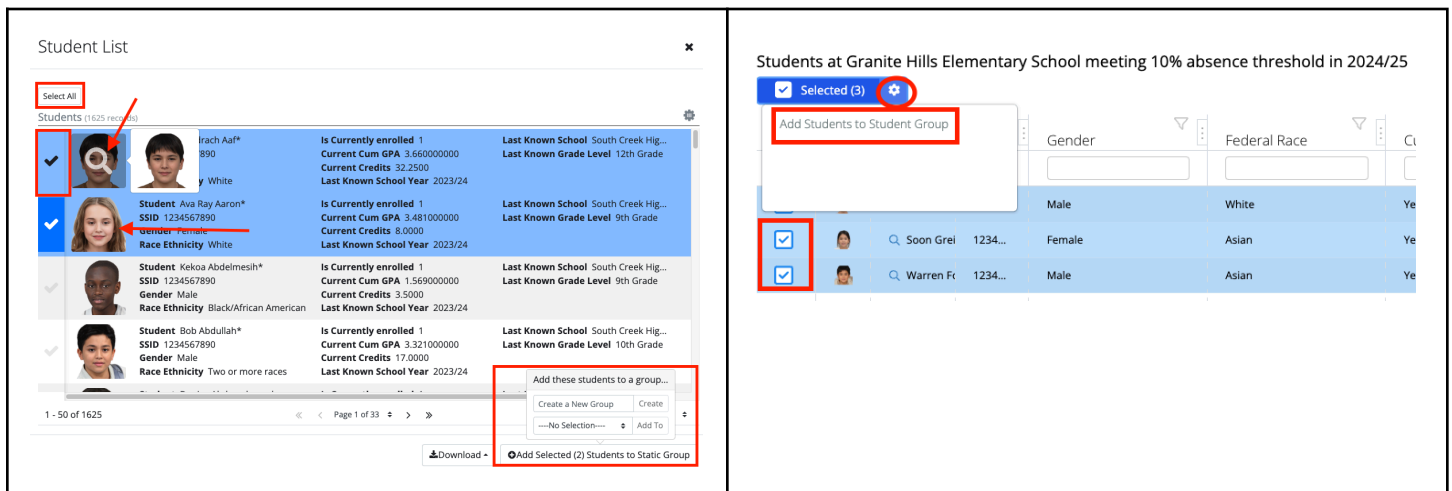

3. **Click the bar or column** to display a list of students contributing to the data points.
  - Connect: Customize the **Chart Data Settings** to display Horizontal (Bars) or Vertical (Columns) and Show Data Labels.
4. Click the **student photo/magnifying glass** to open the **student spotlight** for more detailed information about the student.

- Select students from the student list to create a **static group** for further analysis and evaluation. **Helpful Resource:** [Create and Manage a Static Student Group](#)

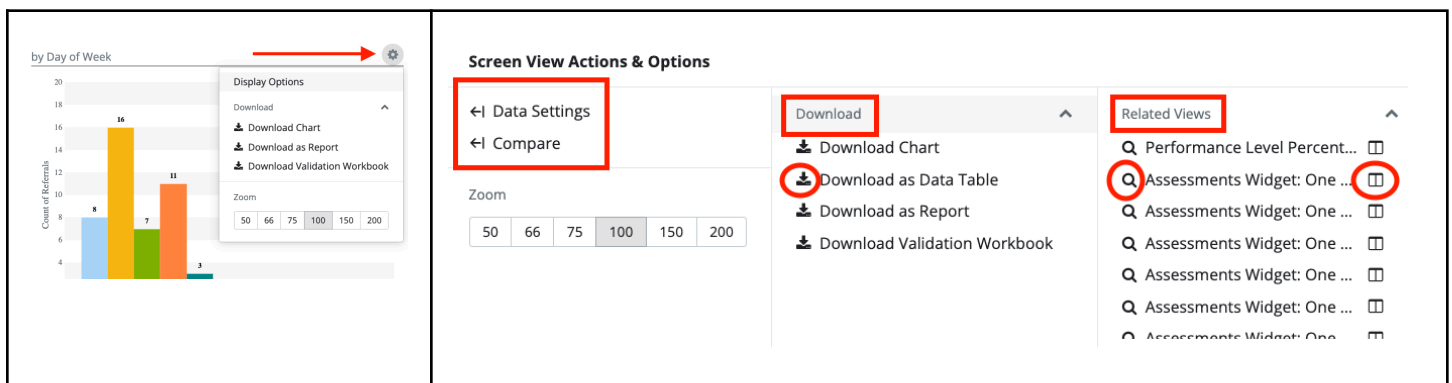

## Create a Student Group

- Click one or more **checkmarks** to the far left, or click **Select All** at the top, then click **Add Selected Students to Static Group** at the bottom of the page.
- Enter a name in the **Create a Name Group** field and click **Create**. Alternatively, select a previously created static group from the **dropdown menu** and click **Add To**.

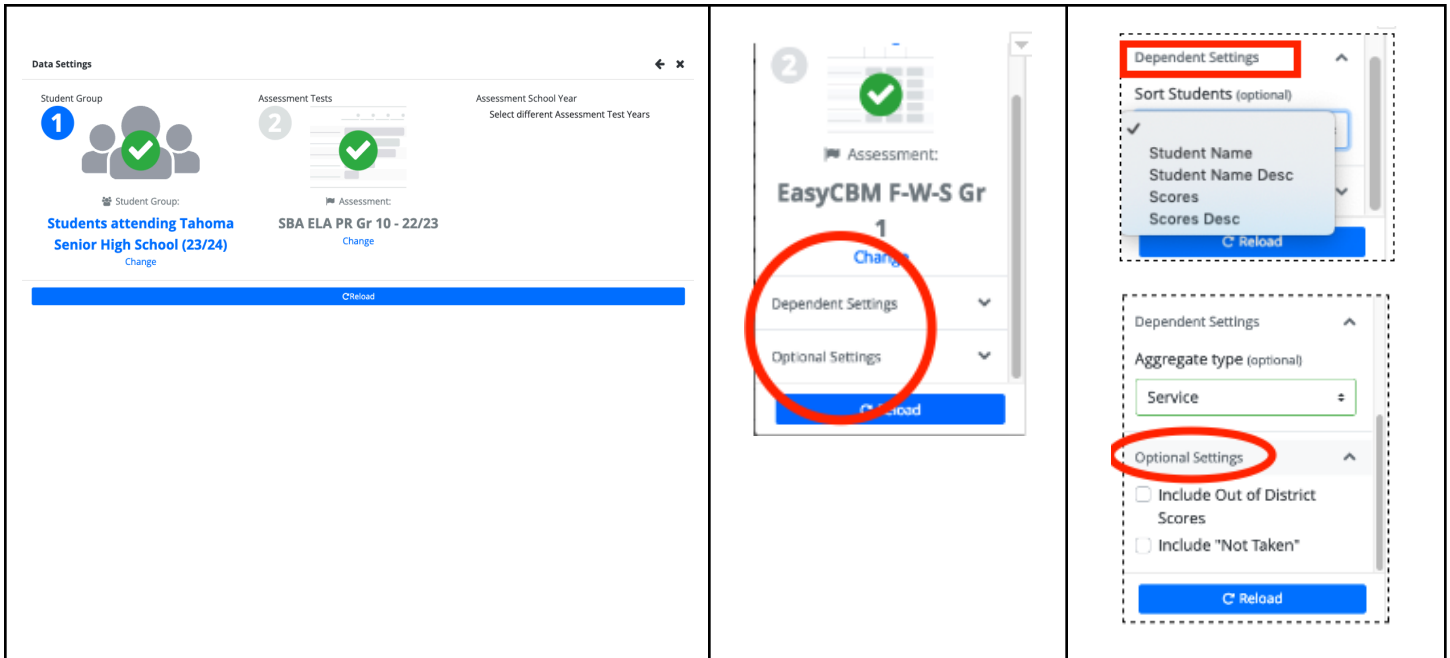

## Using Chart Options

Click the **Action Gear** in the top right corner of a container or screen view to access **Data Settings, Display Options, Download Options, and Related Views**.

- Display Options** allow users to turn values on/off. This helps narrow the data to a smaller group of assessments or students. Selecting the **Performance Level Scores** will enable users to review student assessment data even if the scores are on different scales. **Helpful Resource:** [Creating A Performance Level Set V2](#)

- **Data Settings** allows users to change the student group or assessment displayed, providing them with ultimate flexibility in finding student data. Additionally, you can change data on the screen using **Dependent Settings** and **Optional Settings**.

The image consists of three side-by-side screenshots from the SchoolData.net interface:

- Left Screenshot:** Shows the 'Data Settings' panel with three sections: 'Student Group' (1), 'Assessment Tests' (2), and 'Assessment School Year'. The 'Student Group' section is selected, showing 'Students attending Tahoma Senior High School (23/24)'. A 'Reload' button is at the bottom.
- Middle Screenshot:** Shows a detailed view for the assessment 'EasyCBM F-W-S Gr 1'. A red circle highlights the 'Dependent Settings' dropdown menu. A 'Reload' button is at the bottom.
- Right Screenshot:** Shows two expanded settings panels. The top panel, 'Dependent Settings', has a red box around its title and shows 'Sort Students (optional)' with options like 'Student Name', 'Student Name Desc', 'Scores', and 'Scores Desc'. The bottom panel, 'Optional Settings', has a red circle around its title and shows options for 'Aggregate type (optional)' (set to 'Service') and checkboxes for 'Include Out of District Scores' and 'Include "Not Taken"'. A 'Reload' button is at the bottom.

- **Download Options:** Download the chart, data table, report, or validation workbook.
- **Related Views** are more detailed or alternate data views.
  - Click the **magnifying glass icon** to the left to open details in a new tab.
  - Click the **split box icon** to the right for a split-screen view.
- **Subgroup Comparisons** are available in many of the single assessment views. They allow users to disaggregate an assessment by various subgroups (race/ethnicity, program, gender, etc.). **Helpful Resources:** [Subgroup Comparison V2](#), [Using Assessments Launch View V2](#)

## Left Navigation - Assessment Tests

**All Assessment Tests:** This feature allows you to search for assessments by name, type, category, and school-year score counts.

- **View as KPI:** Screen views for District-Wide, by Schools, Federal Races, Genders, 504, Bilingual, Free/Reduced, Gifted, LAP, Special Education, Title, and Homeless.
- **Progress Monitoring**
- **Item Analysis**
- **Strands**
- **Subgroup Comparisons** are available in many single assessment views. They allow users to disaggregate an assessment by various subgroups (e.g., race/ethnicity, program, gender).

**Assessment Sets:** This feature allows you to search for assessment sets by name, subject area, number of assessments, number of scored assessments, and whether they are shared district-wide.
