

Grades Data Tables V2

Data Tables are a fast and easy method to generate multiple data sets using basic data input selections. Like Data Grids, Data Tables are comprehensive spreadsheets composed of data columns to present information.

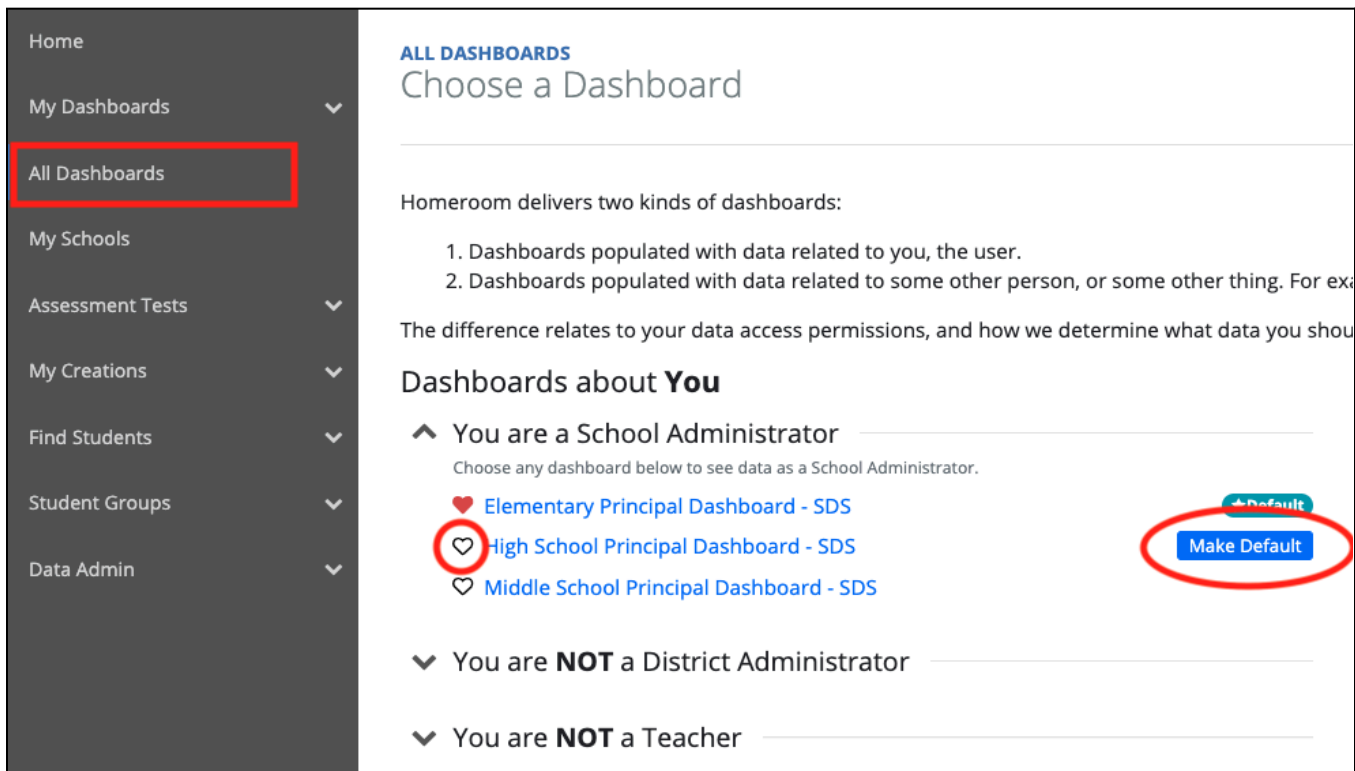

Grades Data Tables allow you to download a list of students in a group in a CSV/Excel file. The file may then be downloaded and distributed for further manipulation, combined with other data, for record-keeping purposes, or for any other intended use.

The resulting Excel can be used to track students' progress over time, assist in class placement determinations, and for additional student monitoring.

- Each term of a year (quarter, trimester, semester, etc.) for all classes within a selected content (reading, math, foreign languages).
- Grades for a particular student group by year and subject.
- GPA for a particular group, by percent and count.

ACCESSING DATA TABLES

Navigate to Homeroom Dashboards and select the **SDS dashboard you want to use**. NOTE: See the [Homeroom Dashboards Basic Navigation \(Connect\)](#) help article for instructions on accessing various dashboards.

Homeroom delivers two kinds of dashboards:

1. Dashboards populated with data related to you, the user.
2. Dashboards populated with data related to some other person, or some other thing. For example, a dashboard for a principal would show data for all students in the district.

The difference relates to your data access permissions, and how we determine what data you should see.

Dashboards about You

^ You are a School Administrator

Choose any dashboard below to see data as a School Administrator.

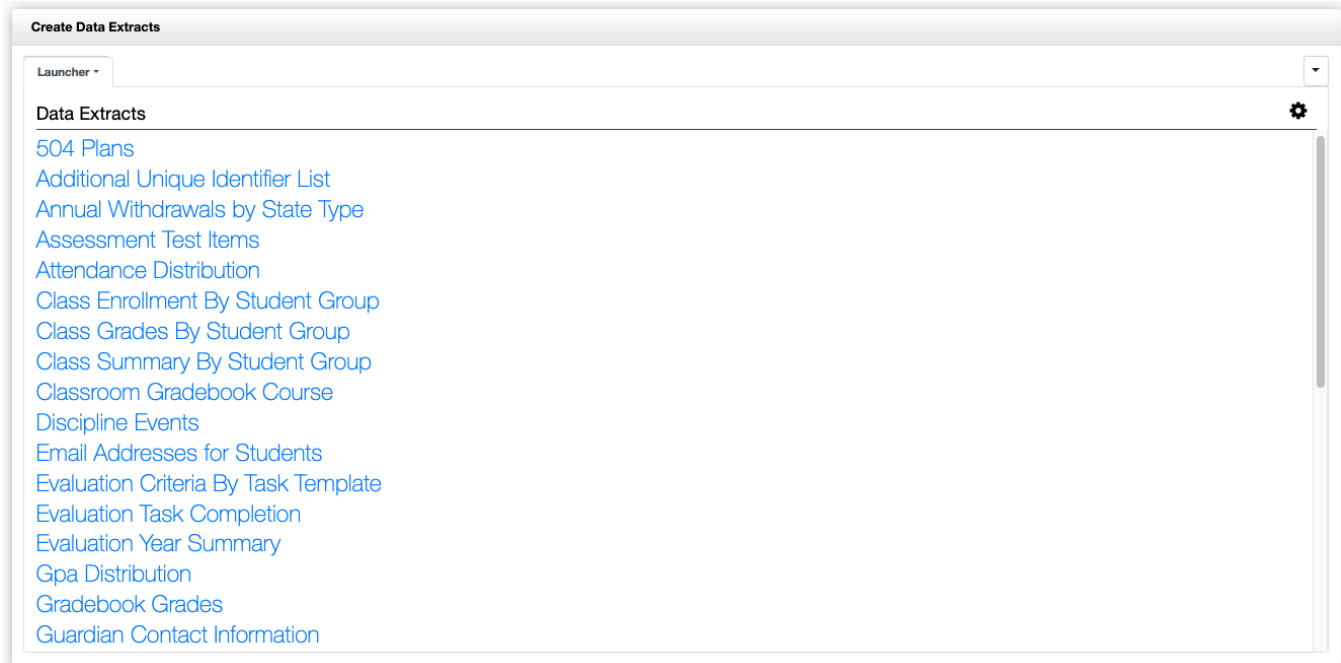

- ♥ Elementary Principal Dashboard - SDS
- ♥ High School Principal Dashboard - SDS
- ♥ Middle School Principal Dashboard - SDS

Make Default

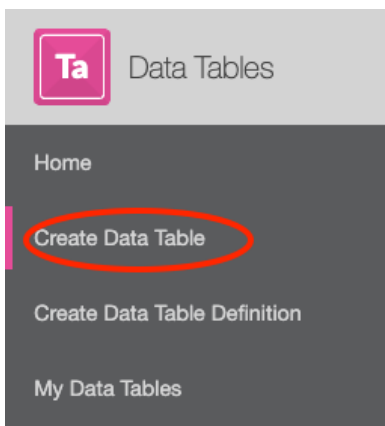

^ You are **NOT** a District Administrator

^ You are **NOT** a Teacher

Scroll to the bottom of your dashboard to find the **Create Data Extracts Container** and select your chosen Data Table.

Alternatively, Data Tables can be accessed by navigating to the Data Tables App within the Data Extracts Bundle and clicking "**Create Data Table**" from the left-hand navigation menu.

Next, select **Browse Category** from **Data Extracts**, search for your chosen Data Table, and select **Build Table**.
