

Column Type	Data Scope	Configuration
<b>Behaviors &amp; Health</b>		
Daily Attendance	Detailed data, ratios, and percentages.	Finite time ranges; specific schools (default to predominant school if left blank).
Yearly Attendance	Overall data for a year.	Specific years or sets of years; default to predominant school of record if unselected. Priority ordering can be set.
Attendance Details	Specific counts (e.g., "Number of days absent/tardy").	Finite time ranges; default to predominant school if school option is blank. Priority ordering can be set.
Incident Counts	Counts of discipline incidents from your SIS.	Whole years or a finite range of days.
Referral Counts	Counts of SWIS referrals.	Limited by time frame, problem behaviors, locations, and more.
Health Log Counts	Counts of health incidents (injuries, illnesses).	Whole years or a finite range of days.
Health Conditions	Lists health conditions for students.	N/A (listing of conditions).
CAA/CIA	Information from students' Certificate of Academic/Individual Achievement.	Includes historical milestones met for EOC and HSPE (Math, Reading, Science, Writing).
<b>Enrollment</b>		
Enrollment: Current Predominant School	District, school, and predominant school enrollment data.	District Enrollment and School Enrollment look at finite ranges of dates (current date is most common).
Current Advisor	The student's current advisor.	N/A (specific data point).
Current Grade Level	The student's current grade level.	Includes a numerical "Grade Level Ordinal" which can be deleted using the action button.
Class	Class enrollment data and is the primary location for class grade data.	Filterable by grade-level or school-year time spans, subject, course, class periods, and specific class terms.
Activities	Data on student activities (most commonly sports).	Configured to look at finite ranges of dates (current date is most common).
<b>Grades &amp; Credits</b>		
"Current ..." Columns	Highly specific data points (e.g., Current Credits).	No configurability beyond Styles.
Term Grade Count	Counts specific grades for a term and credits.	Filterable similar to the Class enrollment column.
External Gradebook Grade Count	Counts specific grades from external gradebooks.	Select the number of Grades and Classes based on user preference. Filterable similar to the Class enrollment column.
External Gradebook Assignment Count	Counts assignments.	Filterable similar to the Class Enrollment column, plus two additional criteria: assignments assigned within a specific timeframe and assignments due within a specific timeframe. Can also specify missing/modified status and select specific assignments.
Risk	Pulls risk indicator values.	Select indicators of interest and columns to include. Requires "Apply Configuration Multiple times" if more than one indicator is selected.
Assessments	Scores and other assessment information.	Specific years/sets of years; filter by specific assessments, subject (e.g., math), scope (e.g., state), or family (e.g., Smarter Balanced). Requires "Apply Configuration Multiple times" if multiple assessments are selected.
Services	Service enrollment information (e.g., Special Education, 504, Bilingual).	Configured for finite ranges of dates. Status Limit options depend on the Time Span. Requires "Apply Configuration Multiple times" if multiple services are selected.
Demographics	Very specific data points.	Gear icon next to the data point can add extra options like codes and abbreviations.
