**Default Home Screen:** Quickly change between the **Intro Page** and **Your Default Dashboard**. If the user requires more information about the selection, click the **"About Default Home Screen"** link.

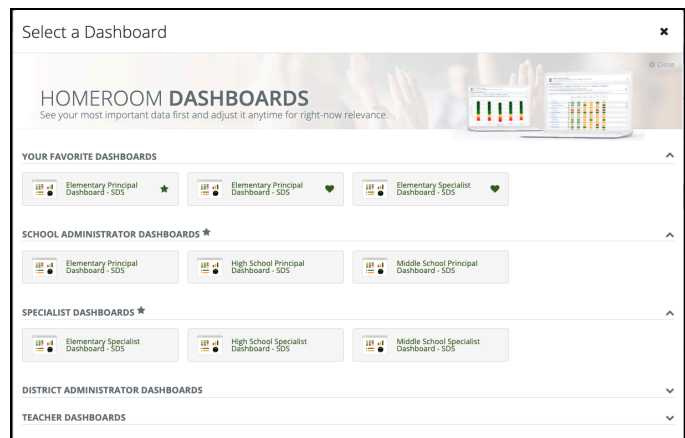

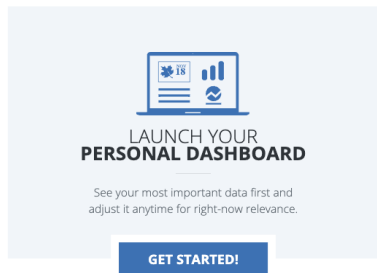

Default Home Screen

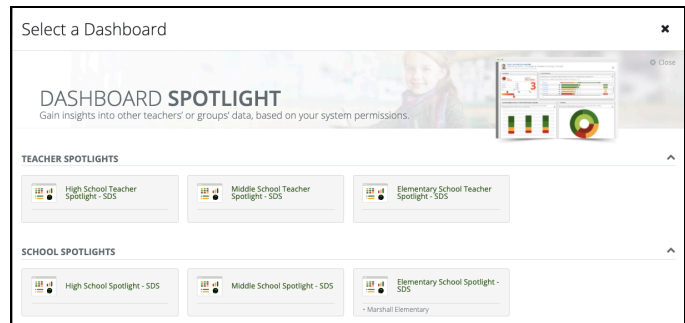

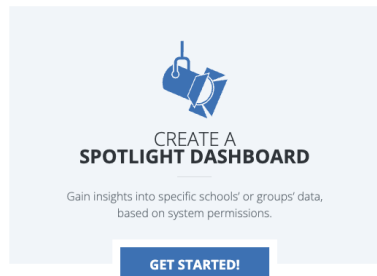

[Logout](#)

Scrolling down the page, Launching Dashboards, Spotlights, Find a Student, and Student Groups are available as tiles to click.

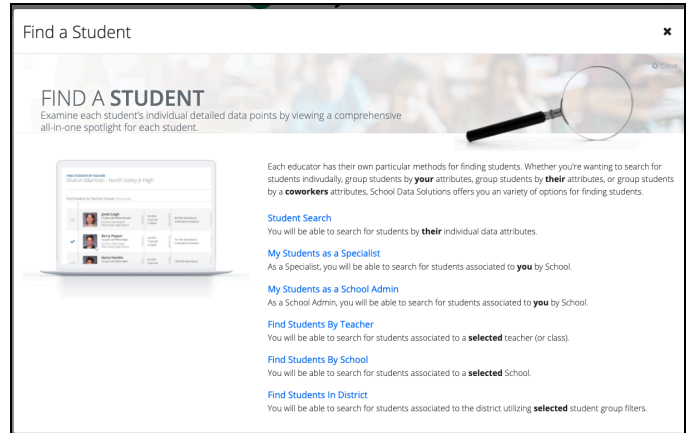

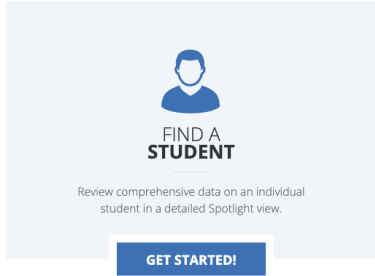

**Launch Your Personal Dashboard** reveals a list of favorite and additional dashboards available based on your role. Clicking any of them will launch a dashboard.

**Launch a Spotlight Dashboard** that displays a list of spotlights available to the user, based on their role. Clicking on any will launch a spotlight.

**Find A Student** launches a replica of the **Find Student** menu in the Left Navigation menu. The advantage of using this method is that there are explanations for each item on the menu. Again, the list of options will vary depending on the user's role.

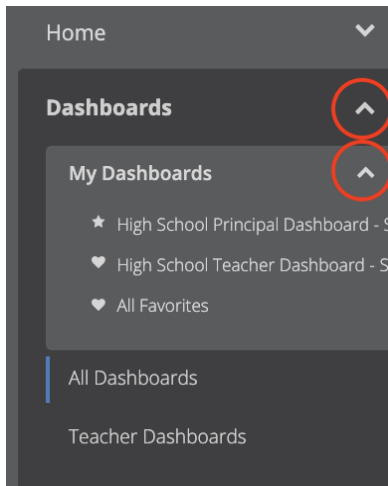

**Student Groups - Automatic** launches various student groups automatically populated by the teacher, school, or district

OR **User Created** launches the student groups you created.

## Left Navigation

The left navigation menu is organized to help users navigate the various options. The arrow on the right signifies a dropdown menu of additional options. NOTE: The user list displayed will differ for users with different roles.

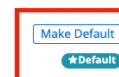

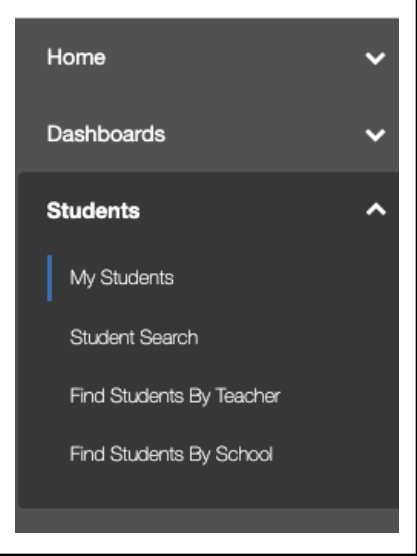

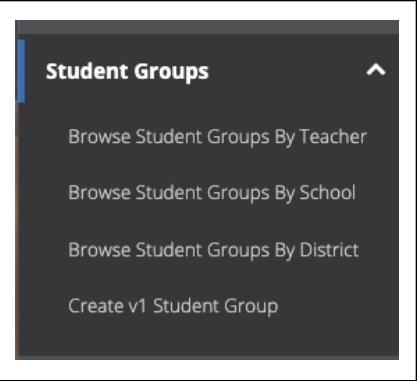

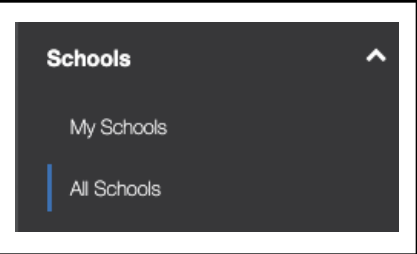

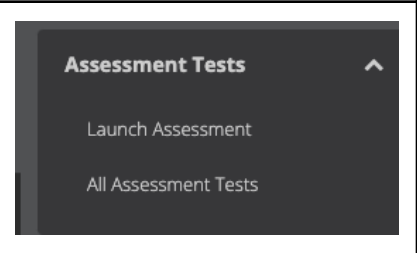

### Under Dashboards are the Following:

- **My Dashboards** identifies any dashboard the user has favorited in the list of All Dashboards.
- **All Dashboards** will display a list of all available dashboards to the district. Users can then select the appropriate default or favorite dashboards.

## Container Navigation Basics

1. Use the scrollbar or gesture to scroll down the dashboard to view different containers.
2. Click the **Action Gear** to the top right to open the **Dashboards Actions and Options**.
3. Click the **name** of a container to go directly to that selection.
4. Click the **checkbox** to hide/display. To select the empty checkbox, the container will be hidden; a checked box indicates that the container will be displayed.

5. Some containers may have **multiple tabs** to access additional screen views across the top.
6. Use the scroll bars within each container to scroll across or down for more data.
7. Hover over the top bar of a container to view **tool options**. **Helpful Resource: Container Tools V2**  
<https://support.schooldata.net/hc/en-us/articles/360045975374>.
8. Resize the container by hovering over the bottom right corner until you see a **resize cursor**.
9. Please note that any adjustments, such as resizing or visibility changes, will reset to the default settings when you leave the dashboard or navigate away. You are in View-only Mode, so feel free to explore different tools and buttons without the risk of permanently changing the system.
