

Students: Completing OSPI Requirements for High School and Beyond V2

Here, you will learn how students can complete the Office of Superintendent of Public Instruction (OSPI) requirements.

Career Identification and Goal

Students must complete three (3) Self-Assessments at least once. These Self-Assessments reveal your **Preferences, Interests, and Skills**. Taking these assessments will gauge your interest in various careers and, upon completion, will generate results based on your personality and preferences. You may take the Self-Assessments multiple times to see how your results change throughout your high school journey. (Example: 9th Grade, 10th Grade, 11th Grade, 12th Grade)

1. Complete the **Preferences, Interests, and Skills** Self-Assessments.

Educational & Career Goals.

In the High School and Beyond process, you'll set goals that help you prepare for your future career. These goals may target things you want to achieve during high school or after high school, helping you improve your academic performance and career preparation. Goal-setting is an essential step to success, often included as a common beginning-of-year and/or term assignment. Because planning for success requires development in multiple areas of life, students can create four types of goals:

- Educational
- Career
- Community/
- Personal

Students must enter at least one Educational and Career Goal during their high school journey.

Four-Year Plan

The Four-Year Plan is where you will start identifying courses to take in high school that will help prepare you for your future career. A four-year plan is a personalized course plan that fulfills graduation requirements and aligns with your career and educational goals, including information about dual credit programs and the **College Bound Scholarship**.

Resume

There are two ways to fulfill the requirements for developing a resume. First, the **Resume Builder** guides you through creating a resume step-by-step. Or if you already have a **Resume**, you can **upload** it directly into the system.

State and Local Graduation Requirements

To be considered for graduation, students must either pass state ELA and Math Requirements or identify a Personalized Pathway Requirement (PPR) that indicates how they meet the requirement differently. Contact your advisor to discuss waivers or substitutions if you need a PPR. The options for satisfying state and local graduation requirements may include academic acceleration, dual credit courses, Career and Technical Education programs, and graduation pathway options.
