## 2025.11.19 SDS Connect Release Notes

Date: November 19, 2025

Version: 2025.11.19

### Homeroom

#### New Features

- **Data Extracts>Data Tables:** Added '**Student Download Options**' to include additional student data points, enhancing self-service reporting and demonstrating ongoing improvements for user empowerment.
- **Build & Save Data Table and Save Button:** The same '**Student Download Options**' capability as above was also added to this process, allowing data points to be included in saved data tables and data tables scheduled for delivery.
- Created a new data table in Homeroom for displaying **Assessment Test Items by students** on Dashboards. (This can be added as a custom screenview per district for Classroom districts.)
- Created a new data table in Homeroom for viewing **Assessment Item Analysis Scores by Standard**. (This can be added as a custom screenview per district for Classroom districts.)

### ALE

#### New Features

- Added a new **Reporting Class Terms selector** form element to the **Create Class| Manage Class pages:** In the **Dates Section** of the **Details Tab**. This is used to set reporting class terms on the **Manage Class > Grade** page.

#### Improvements

- Updated **Data Administrator > Configure Settings > Default Settings/Values > Create Class Default Values** to disallow multiple class term selections, ensuring data integrity.
- Updated **Manage Class > Dates Section > Class Terms Selector** to prevent multiple selections.
- Improved the add record form for **Class Term Grades** in **Subject/Course Details**, streamlining data entry.

### CTE

#### New Features

Data Administrator Role:

- **Configure Industry Recognized Credentials > IRC:** Added **Students sub-page**, featuring a data table that displays student-earned certificates.

- **Configure Industry Recognized Credentials > IRC:** Added a sub-page to assign earned certificates **by student group**, streamlining group assignments.
- **Configure Industry Recognized Credentials > IRC:** Added **Mass Assign sub-page**, to allow mass assignment of student-earned certificates **via file upload**.

## Improvements

- Updated the **Certifications Data Table** to display total student counts and counts by year for better reporting.

## Student Data Grids

### Improvements

- Enhanced the **View** page with a new **Selected Row Action to Add Students to Student Group**.

### Bug Fixes

- Fixed an issue where selecting a **Career Cluster in Card Mode** did not display data in the Career Planner modal.
- Fixed permission issues in the **Term Grades Programs/Services chart**.
- Fixed permission issues in the **Gradebook, Grades Programs/Services chart**.
- Fixed incorrect report printing when using multi-select print options on the **My Student of Concern Plans data table**.
- Addressed an issue where the '**View Submissions**' button opened a blank data table in High School and Beyond.
- Fixed a bug where completed surveys did not display responses when revisited in **High School and Beyond**.
- Corrected issues in the **Attendance Roster By Session report in Pro Dev**.
- In **Evaluations**, fixed an issue where users could not enter **Criteria Notes** when opening page content in a modal during an observation.
- Unnecessary blank sub-pages were removed from the navigation in **Career Planner**.

## General Improvements

- The Application bundle list now correctly respects the Application's '**Is Active**' flag.
