

CONNECT Standard Risk Indicators Q&A

Helpful Resource: [Homerroom Dashboards Risk Indicator Viewer](#)

Q: At any grade level, if a data point is missing, will it calculate the risk using the data it does have? (Example: We do not use WA Kids for 1st grade, will it still be calculated?)

A: If there is no data, all the values will be zero. It wouldn't calculate toward risk.

| Grade K-1 Data Points | Risk Level | | | | measure |
|--------------------------------------|------------|---------|---------|-----------|------------------|
| | 0 | 1 | 2 | 3 | |
| Current Year (CY) Attendance Rate | 100 ← 95 | 95 ← 90 | 90 ← 80 | 80 ← 0 | % attendance |
| Last 20 Days Absence | 0 | 1 → 2 | 3 → 4 | 5 → 20 | days |
| Last 20 Days Incidents | 0 | 1 → 2 | 3 → 4 | 5 or more | Incidents in SIS |
| CY Incidents w/ Suspension/Expulsion | 0 | | | 1 or more | Incidents in SIS |
| Current Year Incidents | 0 | 1 → 3 | 4 → 5 | 6 or more | Incidents in SIS |
| WAKids # Domains Met | 6 | 5 ← 4 | 3 ← 2 | 1 ← 0 | Domains Met* |

Q: Does this look at discipline incidents from both SWIS and SIS? Does this double-count the weight of discipline in the overall risk?

A: It pulls the data from both. If they use SWIS and the incident matches the referral, it would be counted twice.

| Grade 2-3 Data Points | Risk Level | | | | measure |
|---------------------------------------|------------|---------|---------|-----------|----------------------------|
| | 0 | 1 | 2 | 3 | |
| Current Year (CY) Attendance Rate | 100 ← 95 | 95 ← 90 | 90 ← 80 | 80 ← 0 | % attendance |
| Last 20 Days Absence | 0 | 1 → 2 | 3 → 4 | 5 → 20 | days |
| Last 20 Days Incidents | 0 | 1 → 2 | 3 → 4 | 5 or more | Incidents in SIS |
| CY Incidents w/ Suspension/Expulsion | 0 | | | 1 or more | Incidents in SIS |
| Current Year Incidents | 0 | 1 → 3 | 4 → 5 | 6 or more | Incidents in SIS |
| Current Year Referrals (SWIS) | 0 | 1 → 3 | 4 → 5 | 6 or more | referrals recorded in SWIS |
| Last 30 Calendar Day Referrals (SWIS) | 0 | 1 → 2 | 3 | 4 or more | referrals recorded in SWIS |

Q: How is the Current Year (CY) Attendance Rate figured?

A: Attendance rates are the ratio of periods present divided by the number of periods enrolled. This is district-wide. For example, if a student takes a class at both the high school and the middle school, both are factored into the risk. It is not school-specific.

| Grade 2-3 Data Points | Risk Level | | | | measure |
|-----------------------------------|------------|---------|---------|--------|--------------|
| | 0 | 1 | 2 | 3 | |
| Current Year (CY) Attendance Rate | 100 ← 95 | 95 ← 90 | 90 ← 80 | 80 ← 0 | % attendance |
