

2026.02.25 SDS Release Notes

Date: February 25, 2026

Version: 2026.02.25

Homeroom

New Features

- **Leadership Dashboard**
 - **Helpful Resource:** <https://support.schooldata.net/hc/en-us/articles/49427764844819>
 - Enhanced charts and data tables to provide a more interactive and detailed experience:
 - Added drill-down capabilities, allowing users to click directly into student lists and underlying details.
 - Included descriptive titles on all charts for better context.
 - Integrated **Data Settings** drawers to filter views, which automatically sync with page data settings.
 - Created a new **Students with Discipline Incidents/Consequences by Grade Level** chart in the **Discipline Container** to provide clearer insight into discipline patterns.
 - Updated the **Discipline Incident Counts by Grade Level** bubble chart and the **Incident Counts by Grade Level and School** data table to allow filtering by discipline consequences for more granular detail.
 - Improved visual clarity in the **Students Earning Failing Grades** chart by implementing high-contrast black data labels.
 - Added a dedicated **Free/Reduced Lunch (Economically Disadvantaged)** item to the **Student Program Counts** view to improve visibility for this student group.
- Created a new dashboard specifically for the **Guardian and Student roles**, available as an add-on to the standard Homeroom subscription.
 - Updated permissions for the dashboard and its individual components to ensure Guardians and Students only access their own data while restricting visibility of sensitive or secure details.

Improvements

- Extended the use of custom **Program/Service Type labels** to relevant charts & data tables to provide a consistent visual experience across the product. Updating Program/Service type labels is available upon request.
- Updated the **Student Name link** within custom Student Data Grids on Homeroom Dashboards to automatically route to the corresponding leveled Homeroom Student Dashboard. Adding a custom data grid to Homeroom Dashboards can be coordinated through your Customer Service Manager.

Student Data Grids

Improvements

- Introduced **Gradebucket filtering** options to the Gradebook Class Grade Data Set and Gradebook Standard Grade Data Set, enabling more flexible selections.
- Updated the **Column Ordering Properties** area on the Row Selection page to allow for more than three properties when configuring a Data Set, giving users greater control over how data rows are ordered.
- Enhanced the **Student Name link** in the Data Grid Viewer to automatically open the student's corresponding leveled Homeroom Student Dashboard, ensuring users are directed to the most relevant view.

Bug Fixes

- **Homeroom:** Resolved an issue on the **Student Attendance Detail data table** where current year data was missing for students with enrollments in other schools, ensuring complete and accurate attendance records are visible on Student Dashboards.
- Resolved an issue where AI Insights exposed internal configuration details, ensuring a more streamlined user experience.

General Improvements

- **ALE:** Updated how classes with an "All Year" term appear on the wSLP Schedule Class page. All-year classes will now be available for enrollment in the first term and will display across all terms in the class schedule.
- **Four-Year Plans:** Updated the Slot Index display within the Manage Four-Year Plan Template data table to ensure accuracy when building and reviewing plan templates.
- **High School & Beyond:** Added reports and data tables to the Data Extracts area under these same category names. Districts can use the Data Administrator's 'Assign' tools to select and enable only the resources relevant to their state or local requirements.
- **Intervention Plans:** Added the "Add Supplemental Educator(s)" selected-row action to My Student Plans, enabling the addition of supplemental educators to multiple student plans at once.
- **Language Service Plans:** The Supplemental Educator field has been changed from required to optional, allowing more flexibility when entering educator information.
