

ALE Configuring Reference Data Selections V2

These are the building blocks for the system's courses and student learning plans. They include the State Course Codes, Learning Activities, Objectives, and Standards, etc. We typically load default data. If you want to change any available data, you can do so in a couple of ways.

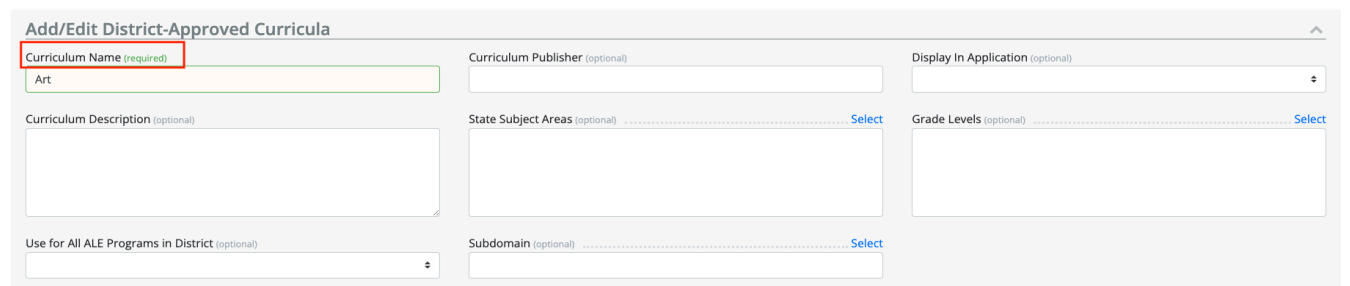

We can provide a spreadsheet with all the reference data if you want to make significant changes or load your curriculum list or standards. You can delete/add/build your lists as you wish, and our programmers can upload them to the system once you are ready.

District Approved Curriculum

1. Click **Reference Data** in the left navigation menu and choose **District Approved Curriculum**.
2. Click **Row Actions & Options** to **Edit** or **Delete** an option.
3. Click **Add Record**, fill in the required field, and click **Add**.

Add Record

- a. **Curriculum Name (Required):** Fill in the name of the curriculum.
- b. **Curriculum Publisher (Optional):** Fill in the name of the Publisher
- c. **Display in Application (Optional, True/False):** Select True or False from the drop-down menu.
- d. **Curriculum Description (Optional):** Provide a description of the curriculum.
- e. **State Subject Areas (Optional):** Select by clicking the **checkmark** to the left. Once checked, it will appear below under **Your Selected State Subject Areas**. Click **View Selected** to review, then choose **Add State Subject Areas** to save.
