

HOMEROOM + CONNECT AI · FOR DISTRICT SUPERINTENDENTS

Lead your district with answers, not reports

Connect AI sits directly on top of your district's data systems and gives you an intelligent, always-available partner. **No logging into multiple platforms. No exports. No waiting on a data team.** Just ask a question — and get an answer you can act on today.

DISTRICT HEALTH AT A GLANCE

See attendance, behavior, and academic trends across every building — available daily and ready for your next BOD meeting.

EQUITY MADE VISIBLE

Surface gaps across subgroups, programs, and schools so resources reach the students who need them most.

STRATEGY YOU CAN DEFEND

Turn multi-year data into SMART goals and improvement priorities your board, staff, and community can rally behind.

Ask Connect AI *Real prompts built for the superintendent's desk*

Every prompt below is a real question you can ask today. Connect AI will pull the data, identify the pattern, and suggest next steps.

WHEN	ASK CONNECT AI	WHAT YOU GET BACK
WEEKLY	Show me attendance rates by building for the last 30 days. Flag any building trending below 90% or showing a 2-week decline.	<i>Building-by-building attendance with the schools that need a phone call this week.</i>
WEEKLY	How many students by building have a failing grade in more than one class right now? Show me the list and let me export it.	<i>A cross-building at-risk roster — instantly exportable for principals and counselors.</i>
MONTHLY	Give me a 3-paragraph district health summary covering academic, attendance, and behavior trends I can share with the board this month.	<i>A board-ready narrative grounded in real data — not a 30-slide deck.</i>
PER DATA CYCLE	Cross-reference our most recent assessment results with attendance data. Where is the largest learning gap occurring between subgroups, and which schools are driving it?	<i>An equity diagnostic that names the schools, grades, and programs where the gap is widest — with the data to back it up.</i>
PER DATA CYCLE	Compare academic, attendance, and behavior results for our Title I, LAP, and Multilingual Learner programs. Where are we closing gaps and where are we losing ground?	<i>A program-level effectiveness scan so you can direct ESSER, Title, and LAP dollars to what is actually working.</i>
AS NEEDED	Identify 3 specific things to celebrate at our school board meeting tonight, grounded in academic, attendance, or behavior wins from the last 30 days.	<i>Three credible, data-backed celebrations — drafted with the numbers that prove them.</i>
ANNUALLY	Based on this year's academic, attendance, and behavior data across the district, help me write 3 SMART goals for next year. Tie each goal to a specific pattern and a monthly leading indicator.	<i>Three improvement goals built from your real data — ready to drop into your strategic plan.</i>
ANNUALLY	Run an equity analysis across all buildings, comparing outcomes by subgroup, EL status, and program. Where are our 3 most persistent gaps, and what would a 60-day action plan for each look like?	<i>A district equity audit with prioritized action steps — perfect for cabinet planning and board strategy sessions.</i>
