

ALE Program Manager: Setting How Subject/Course Records are Affected when a Certificated Teacher on SLP is Changed V2

The ALE application has a setting that will enable subject/course records to be affected in one of two ways when the Certificated Teacher assigned to a Student's Learning Plan is changed:

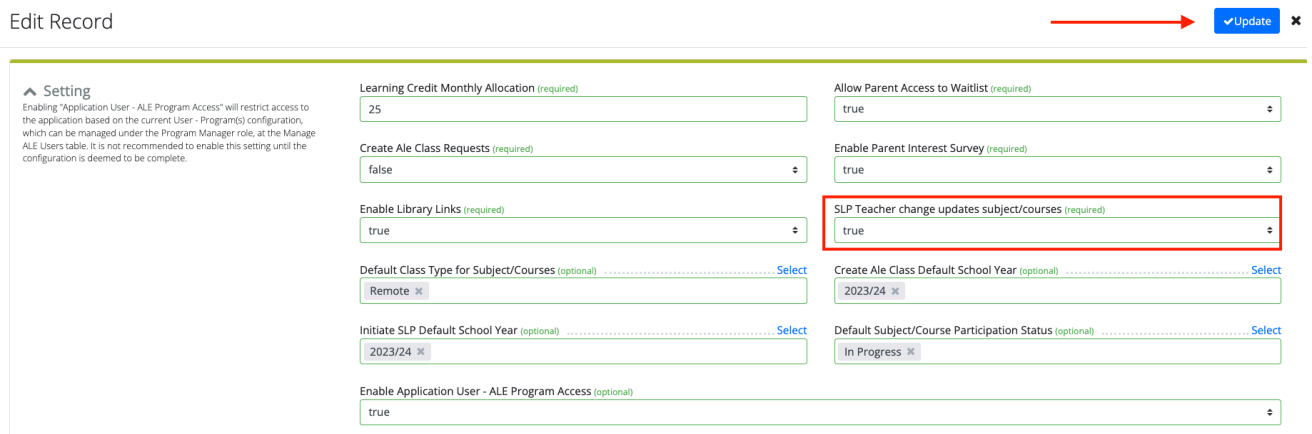

- Teachers assigned to Subject/Course records do not change.
- If the current Certificated Teacher on the plan is assigned to any subject/course records, those records are updated to reflect the new Certificated Teacher on the plan when the plan is changed.

1. This task is completed on the **Program Manager Role** under **Settings** in the left navigation menu. Use the **Row Actions & Options** gear to select **Edit**.

Setting	Value
Allow Parent Access to Waitlist	True
Application User - ALE Program Access	True
Create Ale Class Requests	False
Create Class Default School Year	2023/24
Default Ale Course Type for Subject/Courses	Remote
Initiate SLP Default School Year	2023/24
Learning Credit Monthly Allocation	25
Show Library Links	True

2. Choose **True** or **False** from the drop-down menu for the **SLP Teacher change updates subject/course** field in the resulting form. **True** will update the subject/course records when the Certificated Teacher on the plan is changed. **False** will cause subject/course records not to be affected by the Certificated Teacher on the plan being changed. Click **Update** when finished.

Setting

Enabling "Application User - ALE Program Access" will restrict access to the application based on the current User - Program(s) configuration, which can be managed under the Program Manager role, at the Manage ALE Users table. It is not recommended to enable this setting until the configuration is deemed to be complete.

Learning Credit Monthly Allocation (required)	25	Allow Parent Access to Waitlist (required)	true
Create Ale Class Requests (required)	false	Enable Parent Interest Survey (required)	true
