

ALE Parents: Login Instructions (Connect)

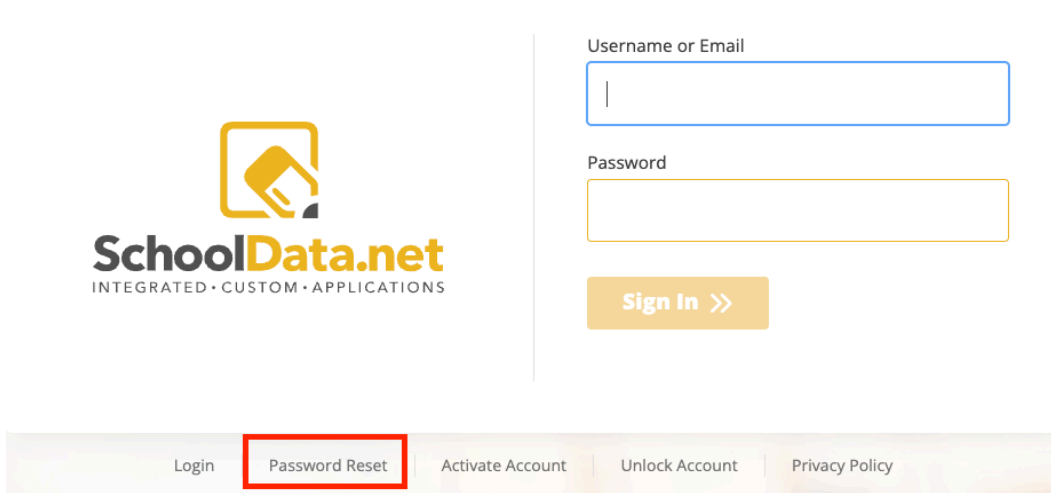

1. A user will access the ALE application by logging into <http://districtname.schooldata.net/connect/#/>

Note: Each school district has a unique URL where the instructions show an address where you will insert your district name in place of the bolded type, such as “seattle.schooldata.net.”

2. If you see a screen that says **Authenticate With District**, click the **Use SchoolData.net Account** button in the bottom left-hand corner.

3. To log in, type in your **Username or Email** and **Password**, and **Sign in**. The first time you log in, or if you have any trouble logging in, you will need to reset your Password using the option found in the **bottom-left** corner.

4. You will be asked for your **Username or Email** - for most parents, your username is your email address. Enter the email address you provided to the school and click **Send Verification Code**.

Password Reset

Forgot your password? It happens. Follow these 3 simple steps to reset your password. If you want to start over, click 'Restart' at the top. If you need help, contact us at support@schooldata.net and we'll guide you through the process, step-by-step.

STEP 1
User details

STEP 2
Verification code

STEP 3
New password

Enter your email address or username below and click 'Send Verification Code'. We'll email you a special code to enter in the next step.

Username or Email

Send Verification Code

5. Check that email address for a message from School Data Solutions. Be sure to check your spam folder, as auto-generated emails are sometimes routed there.
6. Copy and paste or enter the **Verification Code** you received from your email into the verification screen.

STEP 1
User details

STEP 2
Verification code

STEP 3
New password

We just sent you an email. Go check your email, copy that code, and enter it below.

Verification Code

D1F64C79

Verify the Code

7. Once verified, create a **New Password**. Passwords are not stored in the system. Contact your district's School Data Solutions Administrator if you need help with a username or password.

STEP 1
User details

STEP 2
Verification code

STEP 3
New password

There is sensitive data inside, so make sure you choose a secure password (we require at least 8 unique characters). Then keep it somewhere safe.
