Show me students in grades 3-5 who are below standard on Math assessments and also have attendance below 90%...

Show Work

I found **219 currently-enrolled students in grades 3-5** who both scored below standard on a Math assessment this school year (2026-27) and have a full-year attendance rate below 90%.

Here's a sample of the most severely impacted students (sorted by lowest attendance):

Student	Grade	School	Attendance Rate
Moyra Dwivedi	4th	Grand Mountain Elementary	0.0%
Nathan Louis Howarth	5th	Desert Palms Elementary	39.3%
Cristen Woogerd	4th	Desert Palms Elementary	39.3%
Claude Daenitz	4th	Grand Hills Elementary	45.2%
Kuraisha Arwood	5th	Purple Hills Elementary	46.4%
Amairah Teichmer	4th	Grand Mountain Elementary	48.8%

Creating Student Groups

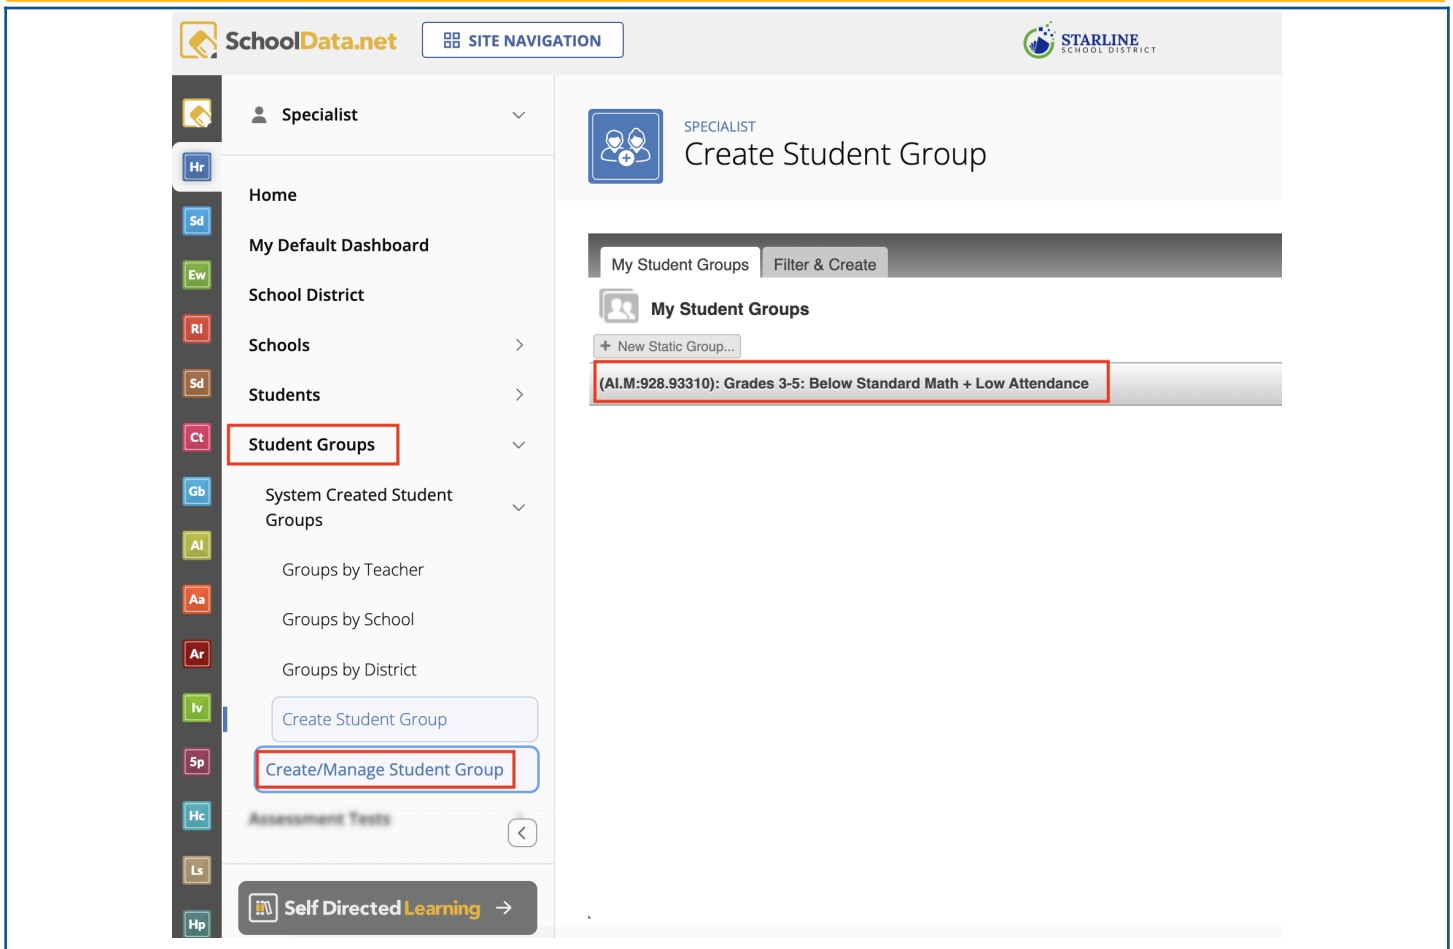

Connect AI helps you quickly identify students requiring intervention and build targeted cohort groups within seconds.

To create a group, select a preset prompt or enter a custom one. Once results display, ask Connect AI to "create a student group".

The screenshot shows the Connect AI interface. On the left, there's a sidebar with sections: "Conversations" (2), "RECENT" (with a prompt "Show me students that h..." from 1 minute ago), "My Prompts" (0, with "No saved prompts yet"), and "District Prompts" (with a prompt "Show me students that had z..." from 34 minutes ago). The main chat area shows a conversation with a prompt: "Show me students that had zero unexcused absences for the first two weeks of school last year but have at least on...". The AI response states: "I found **176 currently enrolled students** who had zero unexcused absences in the first two weeks of the 2025–26 school year (8/27–9/9/2025) but have at least one unexcused absence in the first two weeks of the current 2026–27 school year (8/26–9/8/2026). A sample of the students meeting this criteria includes [Aaden Labarre](#), [Aanya Sundaramurthy](#), [Abhay Bavendam](#), [Addysen D'Ambrosio](#), and [Adoni Hemming](#), among 171 others. Would you like me to export the full list to a file, or create a student group from this list so you can work with it in Connect?". At the bottom, a text input field contains "create a student group" and a blue send button. Below the input field, it says "Enter to send · Shift + Enter for a new line". At the very bottom, a disclaimer reads: "AI responses may be inaccurate — always verify important information. · Your data is never used to train AI models."

Saved groups can be accessed in Homeroom Connect via the left navigation panel under **Student Groups > Create/Manage Student Groups**.

The screenshot displays the SchoolData.net interface. On the left, a vertical sidebar contains a 'SITE NAVIGATION' menu. The 'Student Groups' option is highlighted with a red box, and the 'Create/Manage Student Group' option is also highlighted with a red box. The main content area is titled 'SPECIALIST Create Student Group'. It features a 'My Student Groups' section with a 'Filter & Create' button. Below this, there is a list of student groups, with one group highlighted by a red box: '(A.I.M:928.93310): Grades 3-5: Below Standard Math + Low Attendance'.

Creating and Exporting Files

Connect AI can generate custom data exports based on your queries. To export data, enter your request in the chat message box.

Subject	Students Tested	Met Standard	% Met Standard
ELA	5,072	3,662	72.2%
Math	5,136	3,246	63.2%

Takeaways for the board:

- Attendance is strong (94.5%) at this early point in the year, but nearly 1 in 6 students is already trending toward chronic absenteeism — worth monitoring closely as the year progresses.
- ELA proficiency (72.2%) is notably stronger than Math proficiency (63.2%) on last year's state assessment — a potential focus area.

Would you like this broken out by school, grade level, or student group (e.g., by race/ethnicity, income, or EL status), or exported/charted for the presentation?

Which of my students have missed 3 or more days in the last 20 school days who needs a family outreach call or a ch...

Nora Cooper	Willow Park Middle	8th	13/19	29.5%
Kinzie Kuruganti	Willow Park Middle	7th	13/19	29.5%
Jean Marie Sandberg	Raven Woods High	10th	13/19	30.3%

Note on scope: 954 is the full count meeting the "3+ days" threshold — too many to call today, and this spans the whole district (Grand Mountain, Desert Palms, Willow Park, Purple Valley, Raven Woods, West Woods, Grand Hills, Purple Hills). Many of these are borderline (3-5 days missed), which may warrant a lighter check-in rather than a crisis call, while the ones above (10+ days, often near 0% attendance) are the clearest candidates for immediate family outreach.

Would you like me to:

1. **Narrow this to a specific school or grade** you work with directly,
2. **Export the full list of 954** to a spreadsheet so you can triage by severity, or
3. **Create a student group** of just the most severe cases (e.g., 10+ days absent) for follow-up tracking?

can you generate an email for me to send to the parent/guardian

Subject: Checking In – [Student Name]'s Recent Attendance

Dear [Parent/Guardian Name],

I hope this message finds you well. I'm reaching out because our records show that [Student Name] has missed [X] of the last [20] school days, and I wanted to check in to see how things are going.

Regular attendance is so important for [Student Name]'s learning and connection with classmates and teachers, and I want to make sure we're doing everything we can to support your family if there's something going on that's making it hard to get to school — whether that's health issues, transportation, or anything else.

Could we find a time to talk this week, either by phone or in person? I'd love to hear your perspective and work together on a plan to help [Student Name] get back on track.

Please feel free to reach out to me directly at [phone/email], or let me know a convenient time for me to call you.

Note: Connect AI creates email drafts but does not send them automatically. Please review, copy, and send drafts through your standard email client.

Generate a Progress Summary

Connect AI can compile comprehensive student progress reports encompassing assessment scores, attendance, behavior, and course grades. For example, prompt Connect AI to *"create a progress summary report for [John Doe], including STAR Reading and Math performance from Fall to Winter, attendance, behavior, and course grades."*

What is our districtwide chronic absenteeism rate this school year, and which schools are highest?

Chronic Absenteeism — Board Report Summary

Scope note: 2024-25 and 2025-26 are completed school years; 2026-27 figures are current-year-to-date (as of today). The improving trend is directional and should be read as "year in progress" rather than a final-year outcome.

Districtwide Trend (3-Year)

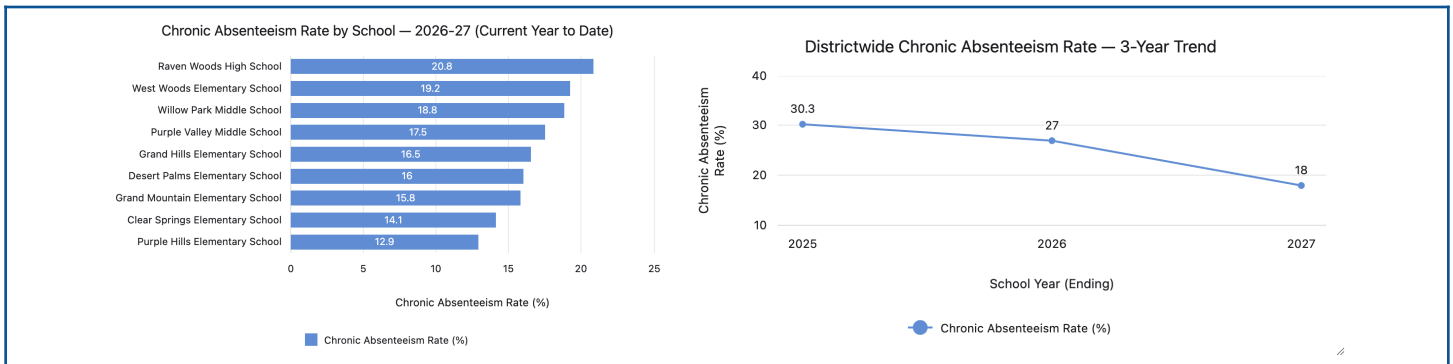

School Year	Students	Chronically Absent	Rate
2024-25	9,575	2,900	30.3%
2025-26	9,370	2,529	27.0%
2026-27 (to date)	8,870	1,595	18.0%

The districtwide chronic absenteeism rate has fallen from 30.3% in 2024-25 to 18.0% so far in 2026-27 — a 12.3 percentage-point improvement over two years, with the largest single-year drop (-9.0 points) occurring this year. Average attendance rate rose correspondingly, from 90.5% to 94.5% over the same period.
