

Creating Your Own Prompts

Ask Your Own Question

You can ask Connect AI a question in plain English - the same way you'd ask a knowledgeable colleague - and Connect AI returns an answer with data, lists, charts, analysis summaries, recommendations, and more all built on your district's own data. Just simply type your question into the designated area and select the purple arrow to start the conversation.

VIEWING PROMPTS FOR District Administrator / Teaching and Learning Administrator

Hi Nicole, how can I help you today?

Here are prompts for a **Teaching and Learning Administrator**. Click to load, ▶ to run, ★ to favorite.
Prompts rely on your district's data being loaded — if a data set isn't available, results may be incomplete or inaccurate.

Are there grade levels or schools where students appear to be missing core course enrollments?

Are there grade levels or schools where students appear to be missing core course enrollments? NA

Show Work

Important data-quality note before the findings: elementary grades (1st–5th) show **0 students** with ``ELA``,`Math``,`Science``,`Social Studies`` subject tags, even though those students clearly have classes (only a handful have "no classes at all"). That's a strong Data Sufficiency Gate signal — not a real finding of missing core enrollment. Elementary schools almost certainly tag their classes under **"Miscellaneous - Elementary"** rather than the subject-specific labels, so my subject filter doesn't match their core instruction at all. I'm excluding elementary grades/schools from the "missing core" conclusion rather than reporting a false 100%-missing rate.

Here's what the data actually supports, scoped to grades 6–12 where the subject tagging is populated:

By grade level (6th–12th), coverage looks solid except:

- 11th grade:** only 377/688 (55%) have a Science class, and only 434/688 (63%) have ELA — both well below the 95%+ seen in 6th, 7th, 8th, 9th, and 10th grade.
