

ALTERNATIVE LEARNING EXPERIENCE
RELEASE NOTES 2022.7.29

Introduction

The following document will highlight the various improvements we have made to our application Alternative Learning Experience (ALE), located in our application bundle “Alternative Learning”.

<https://schooldata.net/suite/applications/alternative-learning-experience/>

Overview

Changes include:

- 3 [Improvements](#)
- 4 [Configurations](#)

Featured Highlights

Updates to the “Attendance Taking Was Completed” button

Logic has been added so that if a user clicks the “Attendance Taking Was Completed” button, but a designation has not been made for each student, attendance cannot be finalized. A warning message will display indicating this and directing the user to make a designation for each student before continuing.

Add features and logic so that access for users can be limited to the subdomain they are associated to

For districts with multiple programs utilizing our application, several features have been added that allow programs to associate users to one or more subdomains, which then limits access to the assigned subdomain. This requires two steps for which a help document will be available soon:

- Assign each user to the desired ALE Program via the “Manage ALE Users” table with selected rows action
- Turn on the application setting to enforce the user-subdomain association

Improvements

ALE-2575

Add ability for "Class Term Date Ranges" and "School Years" to be configurable by subdomain.

ALE-2555

Add features and logic so that users can only view/access SLPs for the subdomain they are associated to

ALE-2481

Update ALE Audit Print report

Configurations

ALE-2582

Parent Account - Make the Parent Summary the default page to load when parents log in

ALE-2576

Update logic for Attendance Taking Was Completed button

ALE-2569

Student/Parent Calendars: Edit hover over to make full text readable

ALE-2535

All ALE Students: Link to SLP with Most Recent SLP start date.
