

EVALUATIONS
Release Notes 2022.9.11

Introduction

The following document will highlight the various improvements we have made to our application Evaluations, located in our application bundle “Human Resources”.

<https://schooldata.net/suite/applications/evaluations/>

Improvements

EVAL-578

Upon completion, tasks without Meeting Details fields no longer use and display a Scheduled Date

EVAL-576

An EvaluatEE no longer has the ability to check Allow Commentary on the Summary/Final Evaluation.

EVAL-579

Ability to use HTML, like text bolding or links to support documents, is now available on Evaluation Criterion Description text and the Evaluation Criterion Performance Level Description text

The screenshot displays a sidebar on the left with a list of criteria, including '3) Capitalizing on students' strengths', '4) Differentiated instruction for students', '5) Teacher use of formative assessment', '3.1 Establish Student Growth Goal(s)', '4) Achievement of Student Growth Goal(s)', and 'Criterion 4: Providing clear instructional focus on content matter and student learning'. The main content area shows the details for '3.1 Establish Student Growth Goal(s)'. It includes a 'STUDENT GROWTH' tag, a description: 'Alignment of this goal with Criterion 3 provides educators the opportunity to attend to a smaller group of individual students and to monitor progress of each and every student in this identified group (Full revised SGG text from OSP)', and three performance levels: 'Unsatisfactory', 'Not Observed', and 'Satisfactory' (partially visible). The 'Unsatisfactory' level description states: 'The teacher does not develop a student growth goal for a group of students within a class who are not yet reaching full learning potential. OR The teacher does not explain how the **knowledge of individual students** informed the goal. The goal does not address an **essential standard** for the teacher's content and grade level. The goal does not require students' **cognitive or emotional engagement**. The teacher does not communicate with students' families about the goal.' The 'Not Observed' level description states: 'Not enough evidence observed or documented yet to mark this criterion'.

Configurations

EVAL-568

A district configuration is now available to auto check the "Allow commentary" box when an Evaluator checks "Share with Evaluatee." *(If a district is interested in this configuration, email support@schooldata.net to request it be turned on and mention the code EVAL-568)*
